# Regional Analysis

# Videos Trending in Multiple Countries

Videos rarely  
trended in multiple > >  
countries

# Videos Trending in Multiple Countries

Among the few videos that trend in multiple countries

> > The vast majority trend for the first time on the same day across countries

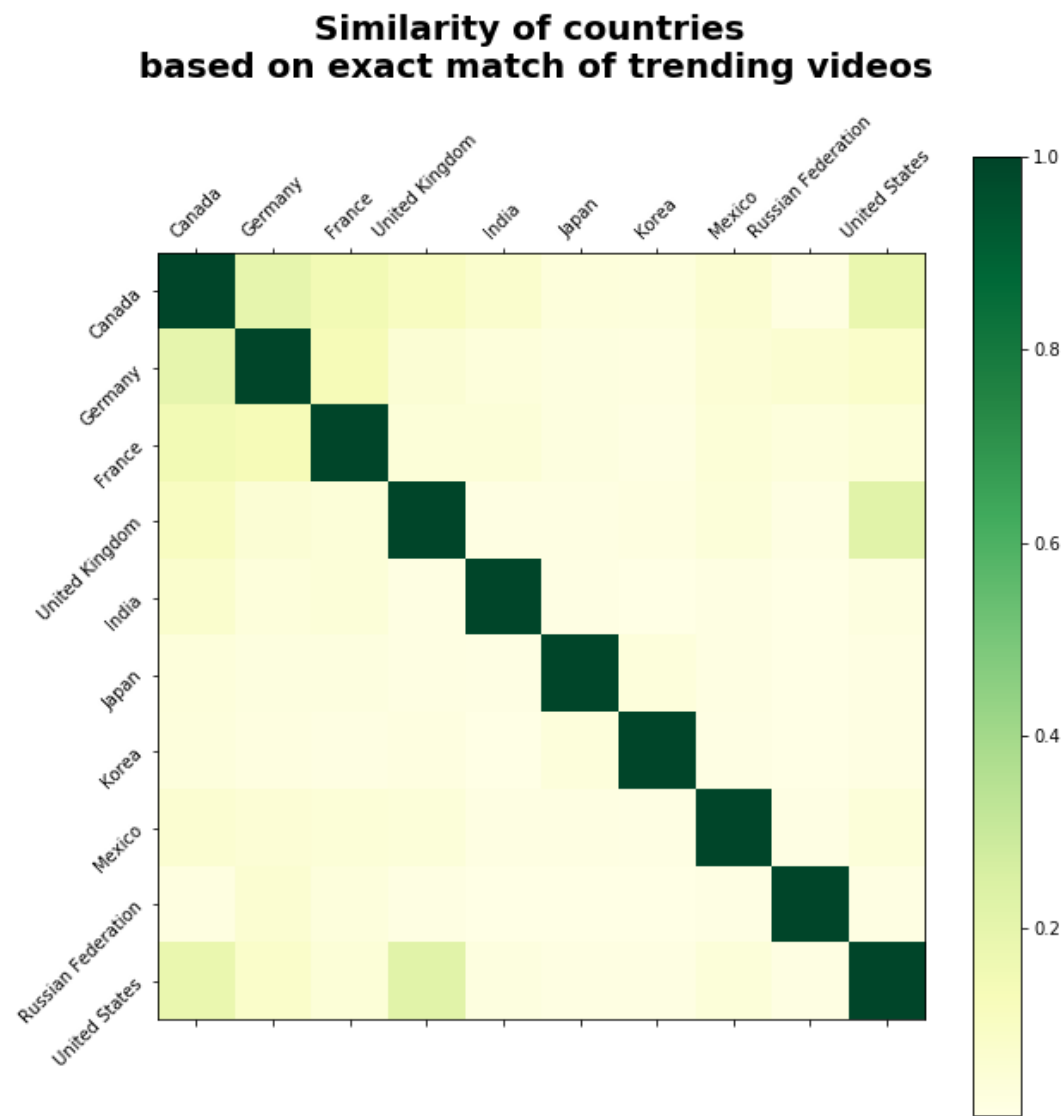

**Whether videos that trended in multiple countries first did so on the same day or different days**

First Trended on the Same Day  
First Trended on Different Days (all or some)

- > US
- > UK
- > France
- > Germany

**Canada** and the **UK**  
generate little trending  
content, rather most of  
their trending videos  
originate from the **US**.

# Categories

**Entertainment** is the most common category in all countries except the UK and Russia.

## Trending Videos Visual: Countries & Categories

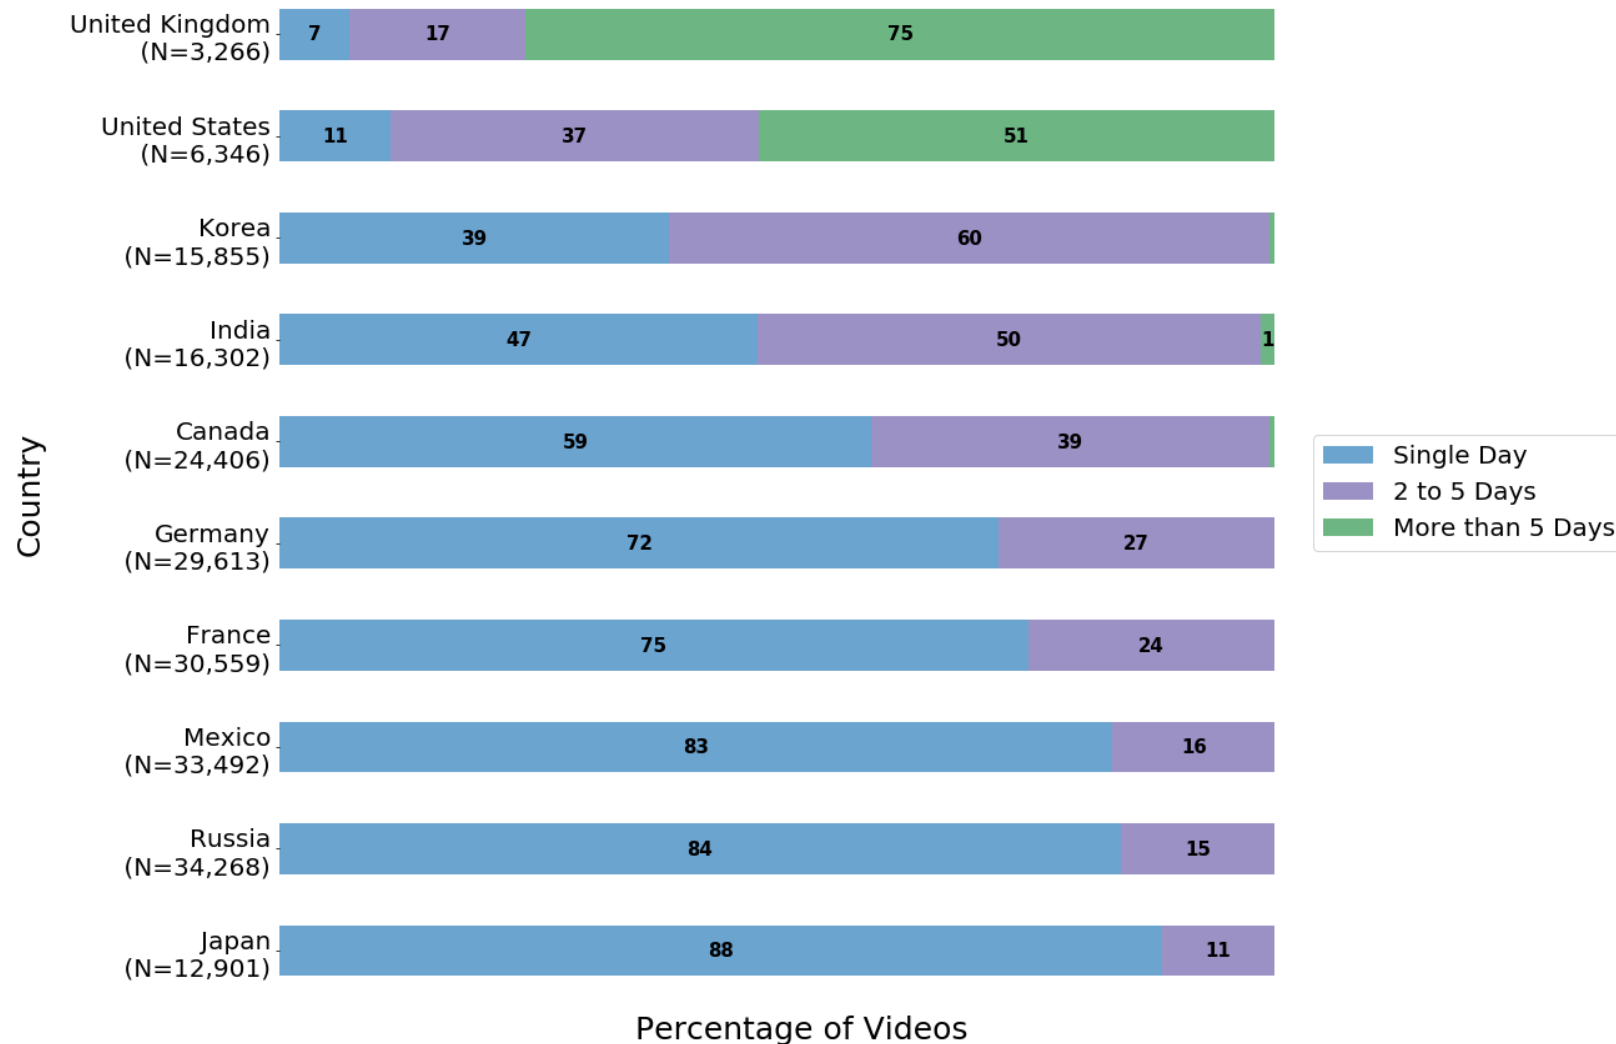

# Number of Days Videos Trended

Video typical  
trend for longer

in the **UK** and  
the **US**

Days Videos Trended by Country

# Popularity Analysis

# Popularity Prediction

**Popularity  $\Leftrightarrow$  Total Trending (in Days)**

Correlation (Continuous Trending, Total Trending) = **0.9869**

**99.2%** of times there was No gap in trending!

## Popularity Prediction Problem

1Day Trending > 'JustTrending'

2 to 5 Days Trending > 'Popular'

6 to 14 Days Trending > 'UltraPopular'

>14 Days Trending > 'Phenomenon'

Total Trending Vs Continuous Trending

# Impact of Features on Popularity: Statistical Approach

**Feature importance of categorical variables  
using chi-square test**

**Feature importance of numeric variables  
using ANOVA test**

# Categories Vs Popularity

## Difference in Days of Trending across Categories

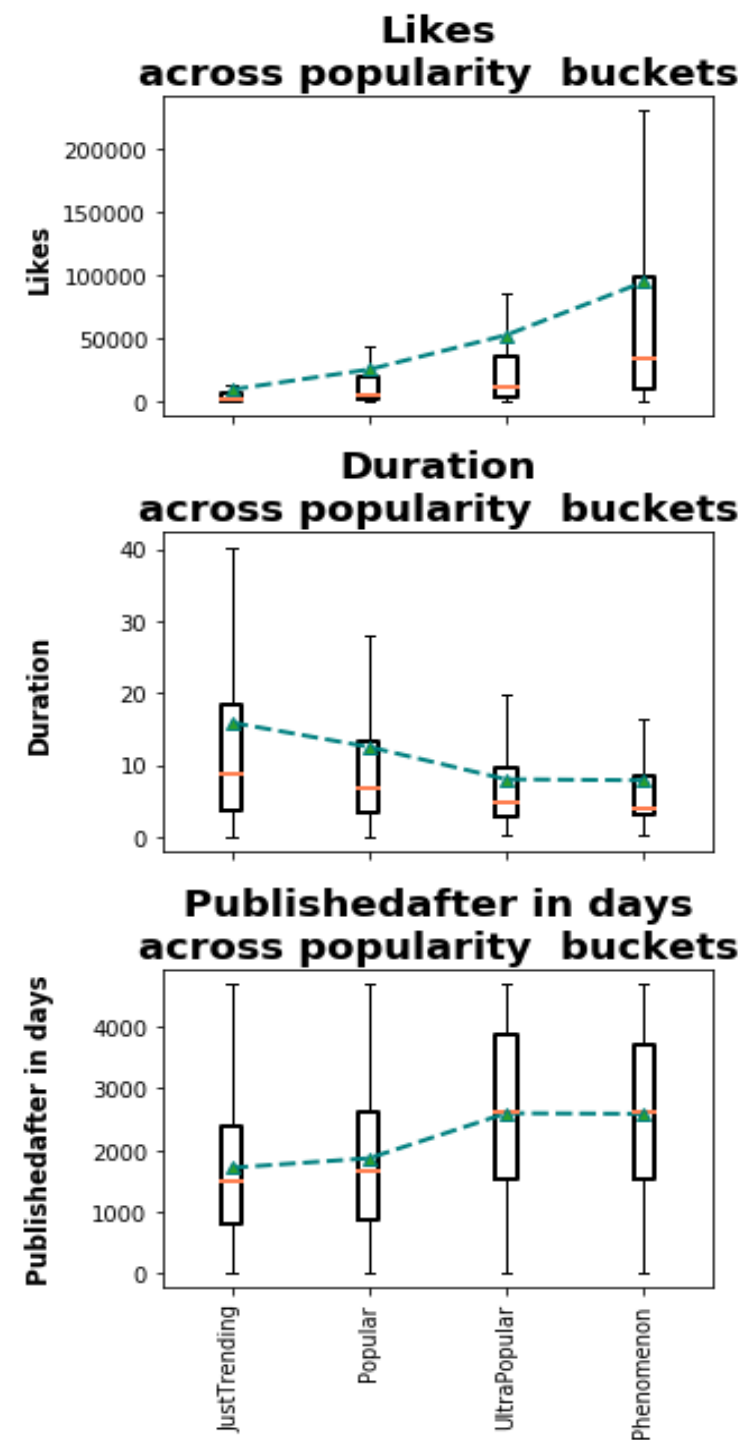

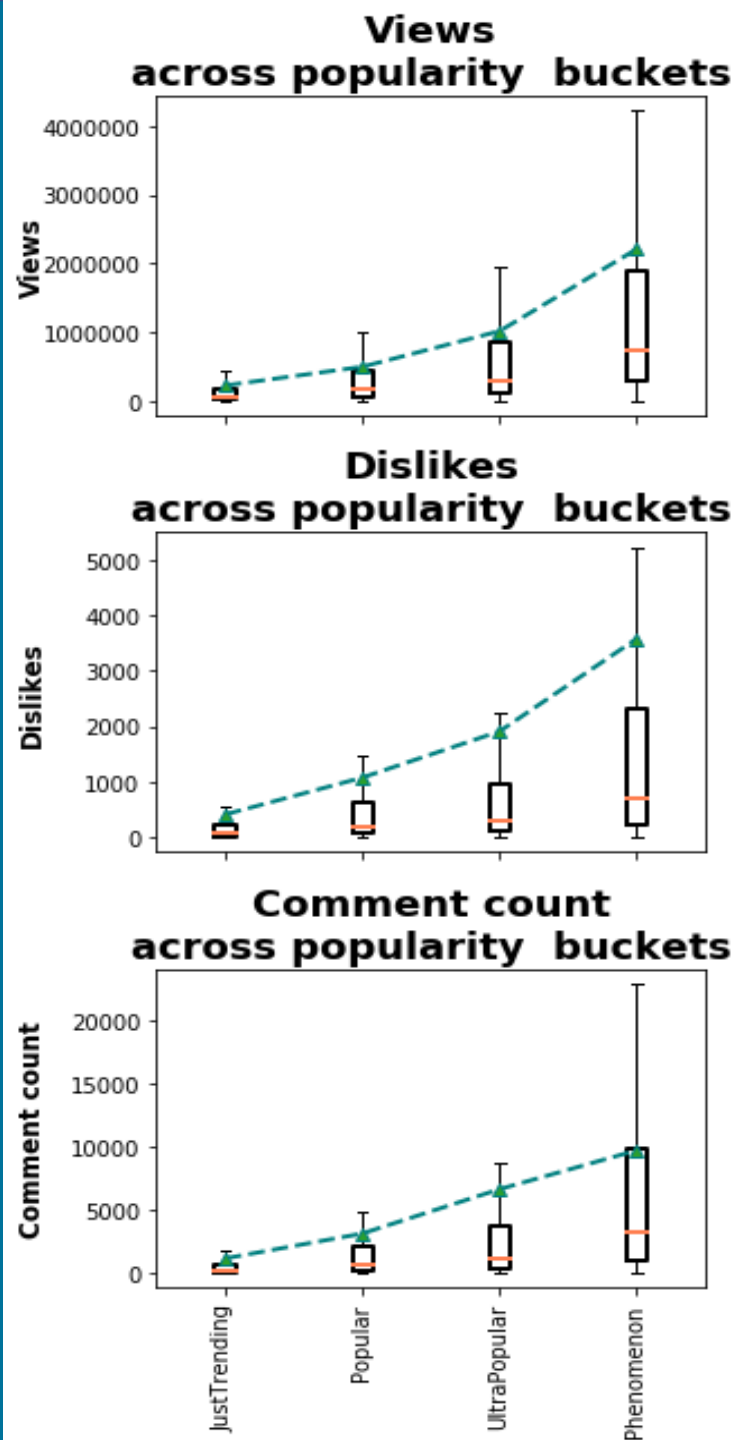

# Impact of “Boolean Features” on Popularity

# “Numeric Features” Vs Popularity

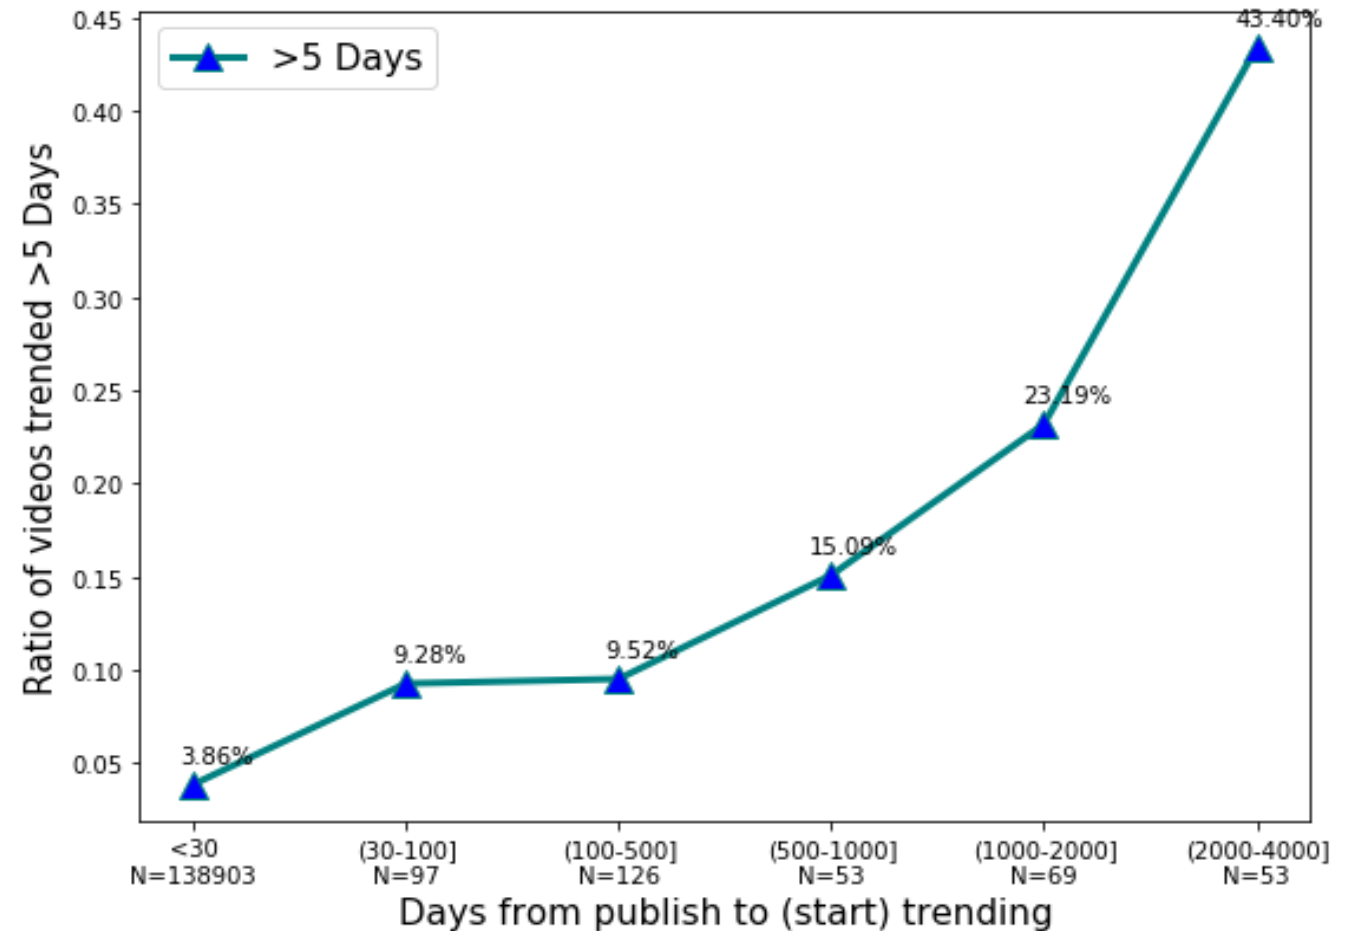

# “The Late bloom Effect”

**%of trending videos  
by "Days to start trending"**

**Ratio of videos trending >5 Days  
Vs  
Days taken to start trending**
